

SUSHENI KALUBOWILA

Data Science Undergraduate | BI & AI Solutions Specialist

+94 71 6529676 | umayangiks@gmail.com | Weliwita Road, Kaduwela | [LinkedIn](#) | [GitHub](#) | [Kaggle](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Data Science undergraduate currently gaining industry experience as a Business Analyst & BI Developer Intern, with hands-on expertise in Power BI, SQL, and predictive machine learning (Python, XGBoost). Proven ability to bridge complex data with actionable business insight through high-fidelity dashboards, full-stack Streamlit applications, and production web platforms. Committed to leveraging predictive analytics and cloud infrastructure (AWS/Azure) to solve real-world business challenges.

TECHNICAL SKILLS

- **Programming:** Python (Advanced), SQL (Advanced), R, Java, C++, Kotlin.
- **Business Intelligence & Analytics:** Power BI (Advanced/DAX), Microsoft Fabric, Power Query, Copilot for Data, Excel.
- **Data Science:** Machine Learning (XGBoost, Scikit-learn), Statistical Modeling, Pandas, NumPy.
- **Web Development:** Next.js, React, TypeScript, Tailwind CSS; Formspree/REST APIs; SSL/TLS encryption.
- **Cloud & DevOps:** AWS (Networking, Storage, Scaling), Azure (VMs, SQL, Security), Vercel, Git/GitHub.
- **Tools & Platforms:** Streamlit, Firebase, MongoDB, ChromaDB, Google Colab.

PROFESSIONAL EXPERIENCE

Business Analyst & BI Developer Intern | Tea Tang (Pvt) Ltd

2026 – Present

- Working in a combined Business Analyst and BI Developer capacity, translating stakeholder requirements into data-driven reporting solutions.
- Designing and maintaining Power BI dashboards to support business decision-making and performance tracking.
- Performing data analysis, requirement gathering, and process documentation to bridge business needs with technical implementation.

KEY PROJECTS

FutureGenZ Academy Portal | Independent Business Venture | Next.js, TypeScript, Tailwind CSS

- Engineered and launched a secure, high-performance web portal (futuregenzacademy.com) that evaluates and routes Sri Lankan students toward free higher-education pathways in Germany.
- Built a highly adaptive, no-reload UI that dynamically shifts form fields based on user intent, using Next.js App Router, React, and Tailwind CSS.
- Architected end-to-end data transmission by mapping custom schemas into an automated Formspree backend, ensuring encrypted, SSL/TLS-compliant applicant data handling via RESTful payload structures.
- Managed deployment and DevOps via Vercel, Git/GitHub version control, and environment configuration.
- [View site](#)

Autonomous AI Risk Assessment & Compliance System | IRWA Project

- Engineered a multi-agent autonomous system using CrewAI to automate auditing of AI use cases across healthcare and finance sectors.
- Integrated Retrieval-Augmented Generation (RAG) with ChromaDB for real-time GDPR and global ethical-standards compliance.
- Developed a full-stack Streamlit dashboard with LiteLLM and Google Gemini for instant risk classification.

Bank Churn Intelligence | Customer Churn Prediction System

- Built an end-to-end dashboard using XGBoost to identify high-risk customers with high accuracy.
- Developed reproducible data pipelines and a “what-if” simulator to model retention-strategy impact; led a team through preprocessing and secure cloud deployment.

E-Commerce Sales Intelligence | *Interactive Power BI Performance Dashboard*

- Developed an end-to-end Power BI dashboard for E-Com Express, tracking a \$1.25B revenue stream and key operational KPIs.
- Performed ETL with Power Query and engineered complex DAX measures (AOV, 29.7% cancellation rate) to surface revenue leakage and regional sales trends.

AI Symptom Checker | *Intelligent Health Assistant* | *Streamlit, Google Gemini, Firebase*

- Engineered a diagnostic web application for AI-driven symptom analysis with Firebase Auth for secure user management and automated PDF exports, hosted on Streamlit Cloud.
- [Live App](#)

Self-Attention Optimization Research (HASN Framework) | *MLOM Project*

- Conducted a technical review of Transformer architectures, identifying the $O(n^2)$ computational bottleneck in long-sequence processing, and proposed a Hierarchical Sparse Attention Network (HASN) to reduce complexity toward $O(n \log n)$ using chunk-based summary representations.

Penny Pilot | *Personal Finance Tracking App* | *Kotlin, Room DB, MPAndroidChart*

- Developed a native Android application for real-time expense management with local storage and advanced financial visualization.

CERTIFICATIONS & ACHIEVEMENTS

- **Data Analytics (Microsoft):** Microsoft Fabric (End-to-End Analytics), Power BI, and Copilot for AI-driven data exploration.
- **Cloud Computing (AWS):** Cloud Networking, S3 File Systems, Computing Solutions, Auto-Scaling/High-Availability Web Apps.
- **Cloud Infrastructure (Azure):** Virtual Networks, VM Management, Blob Storage, and Load Balancing for application resiliency.
- **AI & Machine Learning:** AI/ML Engineer (Stage 1 & 2) via SLIIT; Kaggle specializations in Python, Pandas, Data Visualization, Intro to ML.
- **Professional Programming & Emerging Tech:** “Python for Data Science - Real Time Experience” (Udemy); University of Moratuwa Python foundations; AI Agent Development with Azure AI Foundry (Microsoft Learn Student Ambassadors).

EDUCATION

BSc (Hons) in Information Technology, Specialized in Data Science	SLIIT	2023 – 2027 (Reading)
A/L Examination - Bio Science Stream	R/Kalawana National School	2019 – 2021

ADDITIONAL INFORMATION

- **Languages:** English (Professional), Sinhala (Native), Tamil (Basic).
- **Soft Skills:** Team Leadership, Critical Thinking, Effective Technical Communication.
